Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Axelsson 3,175,323.

Axelsson discloses a fly fishing rod (structure of the rod is not being particularly claimed) including a handgrip (intermediate portion of 44), a hollow cylindrical reel seat (13, 14, 19; reel seat not particularly claimed), a rod shaft (44) with a portion extending past the handgrip (closer to the end of 44 inserted into 29), a sleeve like adapter (28) formed with an engaging locking means (37), the reel seat (14) being slidable over the adapter and formed with an engageable member (34) arranged to be engaged by the engaging locking means (37) for connecting the reel seat to the handgrip (see Figs. 1, 2) and to be removed therefrom by disengaging the engageable member from the engaging locking means (via 36).

In regard to claims 6-8, Axelsson discloses handle means (11, 36, or 43) which is wing shaped (11 and 43 extend in a cantilevered manner).

In regard to claim 9, Axelsson discloses at least one adherence device (longitudinal slots in 28 as shown in Figs. 1, 2, & 4).

3. Claims 1-6, 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Casset 4,133,133.

Casset discloses a fly fishing rod (structure of the rod is not being particularly claimed) including a handgrip (intermediate portion of 10), a hollow cylindrical reel seat (13; reel seat not particularly claimed), a rod shaft (10) with a portion extending past the handgrip (end of 10 closer to 8), a sleeve like adapter (1) formed with an engaging locking means (4, 5), the reel seat (13) being slidable over the adapter and formed with an engageable member (36 in Fig. 2) arranged to be engaged by the engaging locking means (5) for connecting the reel seat to the handgrip (see Fig. 2) and to be removed therefrom by disengaging the engageable member from the engaging locking means (when 36 is taken out of 5); a handle means (any portion of 13 which may be grasped to manipulate the position of 13 and 36 relative to 5).

In regard to claim 4, Casset discloses the groove having longitudinal and transversal portions (see straight portion of 5 extending along 10 and the round portion which extends in a transverse direction from the straight portion).

In regard to claim 9, Axelsson discloses at least one adherence device (17, 30, 31).
